

Creator-tool

Instruction manual

This manual will provide step-by-step instructions on how to use the Anywysye AI-tool to create your own **Wysers**

A **Wyser** is a concise and engaging audio-learning module, designed with a didactic format and backed by scientifically proven methods that ensure effective knowledge retention for its listeners within a 10-15 minute timeframe. A Wyser can consist of multiple chapters and sits within a Course.

Step 1: Create a new course

Lisa Jukema 

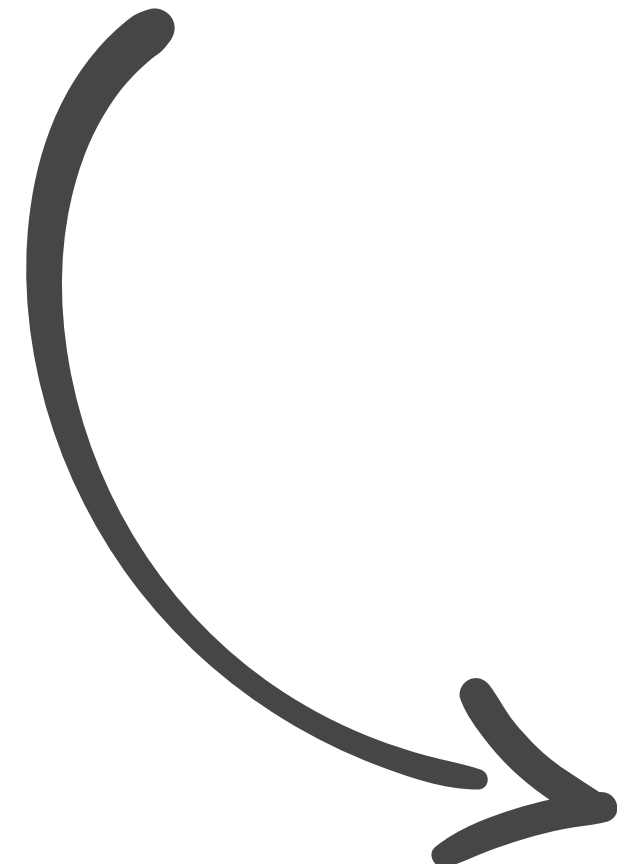

My course

Courses are a group of Wyses, organized around a specific topic. It allows clear and focused categorization of the content, to help users easily navigate and find the Wyses they are interested in.

To create a Wyser, start with creating a Course for it.

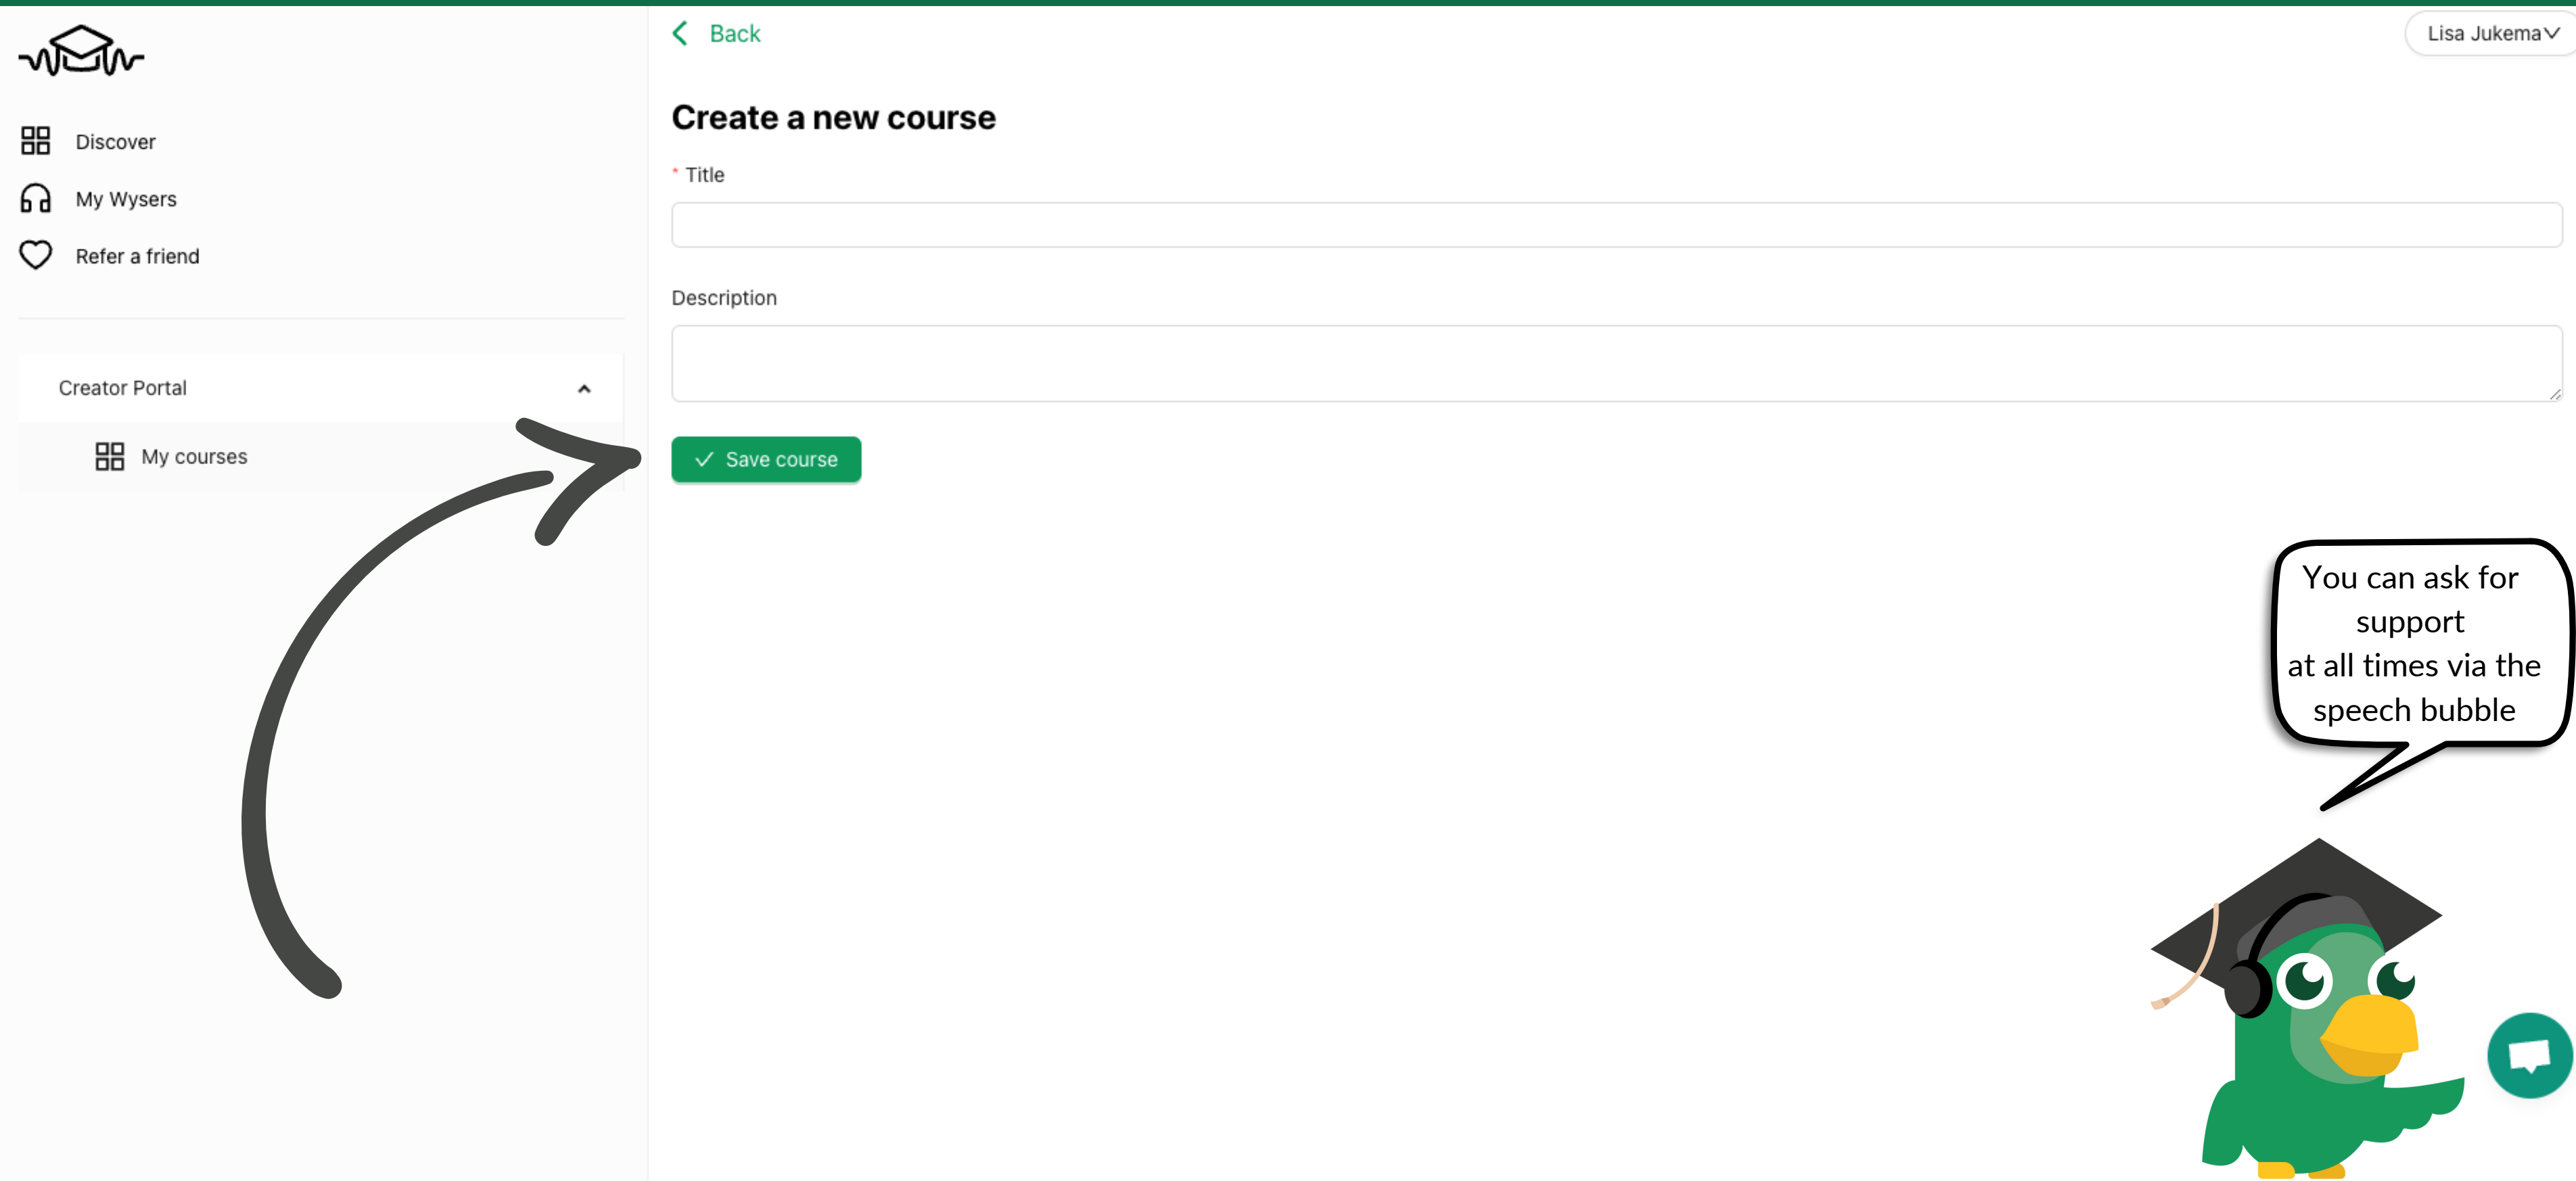

A Level Psychology Paper 1 Social Influence

+ Create a new course

Step 2: Give your course a title and description, and click 'Save course'

The screenshot shows a user interface for creating a new course. On the left is a sidebar with navigation options: Discover, My Wyses, Refer a friend, and a Creator Portal section containing My courses. A large black arrow points from the 'My courses' link to the main content area. The main area is titled 'Create a new course' and includes a 'Back' link, a 'Title' input field, a 'Description' input field, and a green 'Save course' button. In the top right corner, the user's name 'Lisa Jukema' is displayed. In the bottom right corner, a green penguin character wearing a graduation cap and headphones is shown next to a speech bubble that says 'You can ask for support at all times via the speech bubble' and a circular chat icon.

Awesome, your Serie has been created. Now let's add Wysers to it.

+ Add a Wyser

Step 4: Wyser title and description

The screenshot shows the 'Create a Wyser' interface. On the left is a navigation sidebar with 'Discover', 'My Wysers', 'Refer a friend', and 'My courses'. The main area has a progress bar with six steps: 1. Title & description (active), 2. Notes, 3. Content, 4. Processing, 5. Review, and 6. Published. The form fields include: 'Title' (required), 'Description', 'Language' (set to English), 'Kind of listener' (set to 'A student at university with a basic understanding of the subject'), and 'Voice' (with four radio button options: 'Play Laura's example', 'Play Simon's example', 'Play Jason's example', and 'Play Kimberly's example'). A green 'Create Wyser' button is at the bottom. A parrot mascot wearing a graduation cap and headphones is in the bottom left, with a speech bubble that says: 'Choose your language, type of audience and your preferred voice here. Hover over the "i" for more information about each of these parameters. Then click on "Create Wyser"!'. The user's name 'Lisa Jukema' is in the top right, and a chat icon is in the bottom right.

Chapter title

What is artificial intelligence?

Text

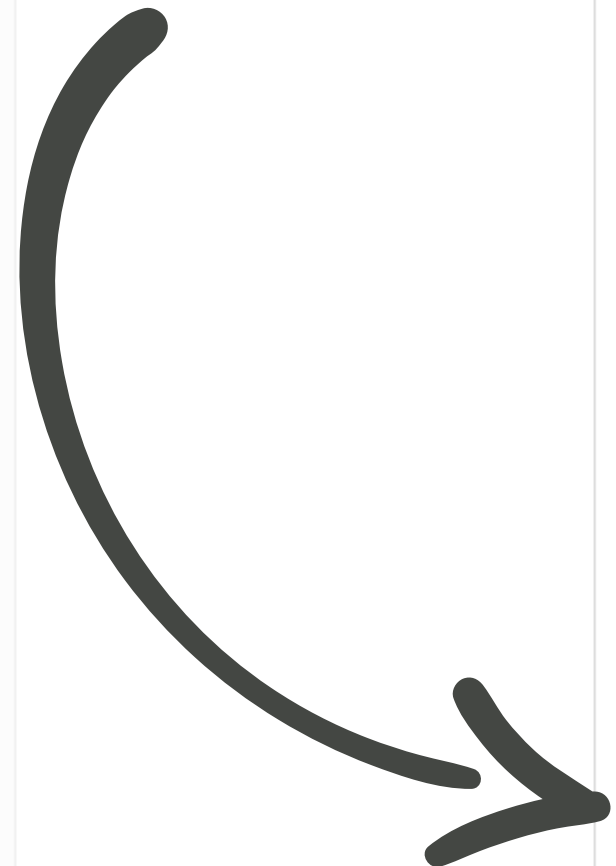

Artificial intelligence (AI) is intelligence—perceiving, synthesizing, and inferring information—demonstrated by machines, as opposed to intelligence displayed by non-human animals or by humans. Example tasks in which this is done include speech recognition, computer vision, translation between (natural) languages, as well as other mappings of inputs.

[AI applications include advanced web search engines \(e.g., Google Search\), recommendation systems \(used by YouTube, Amazon, and Netflix\), understanding human speech \(such as Siri and Alexa\), self-driving cars \(e.g., Waymo\), generative or creative tools \(ChatGPT and AI art\), automated decision-making, and competing at the highest level in strategic game systems \(such as chess and Go\).\[1\]](#)

Create a Wyser

✓ Title & description — ✓ Notes — **3** Content — 4 Processing — 5 Review — 6 Publish

👍 Awesome, the hard work is done, now let's convert the information you have provided into a Wyser.

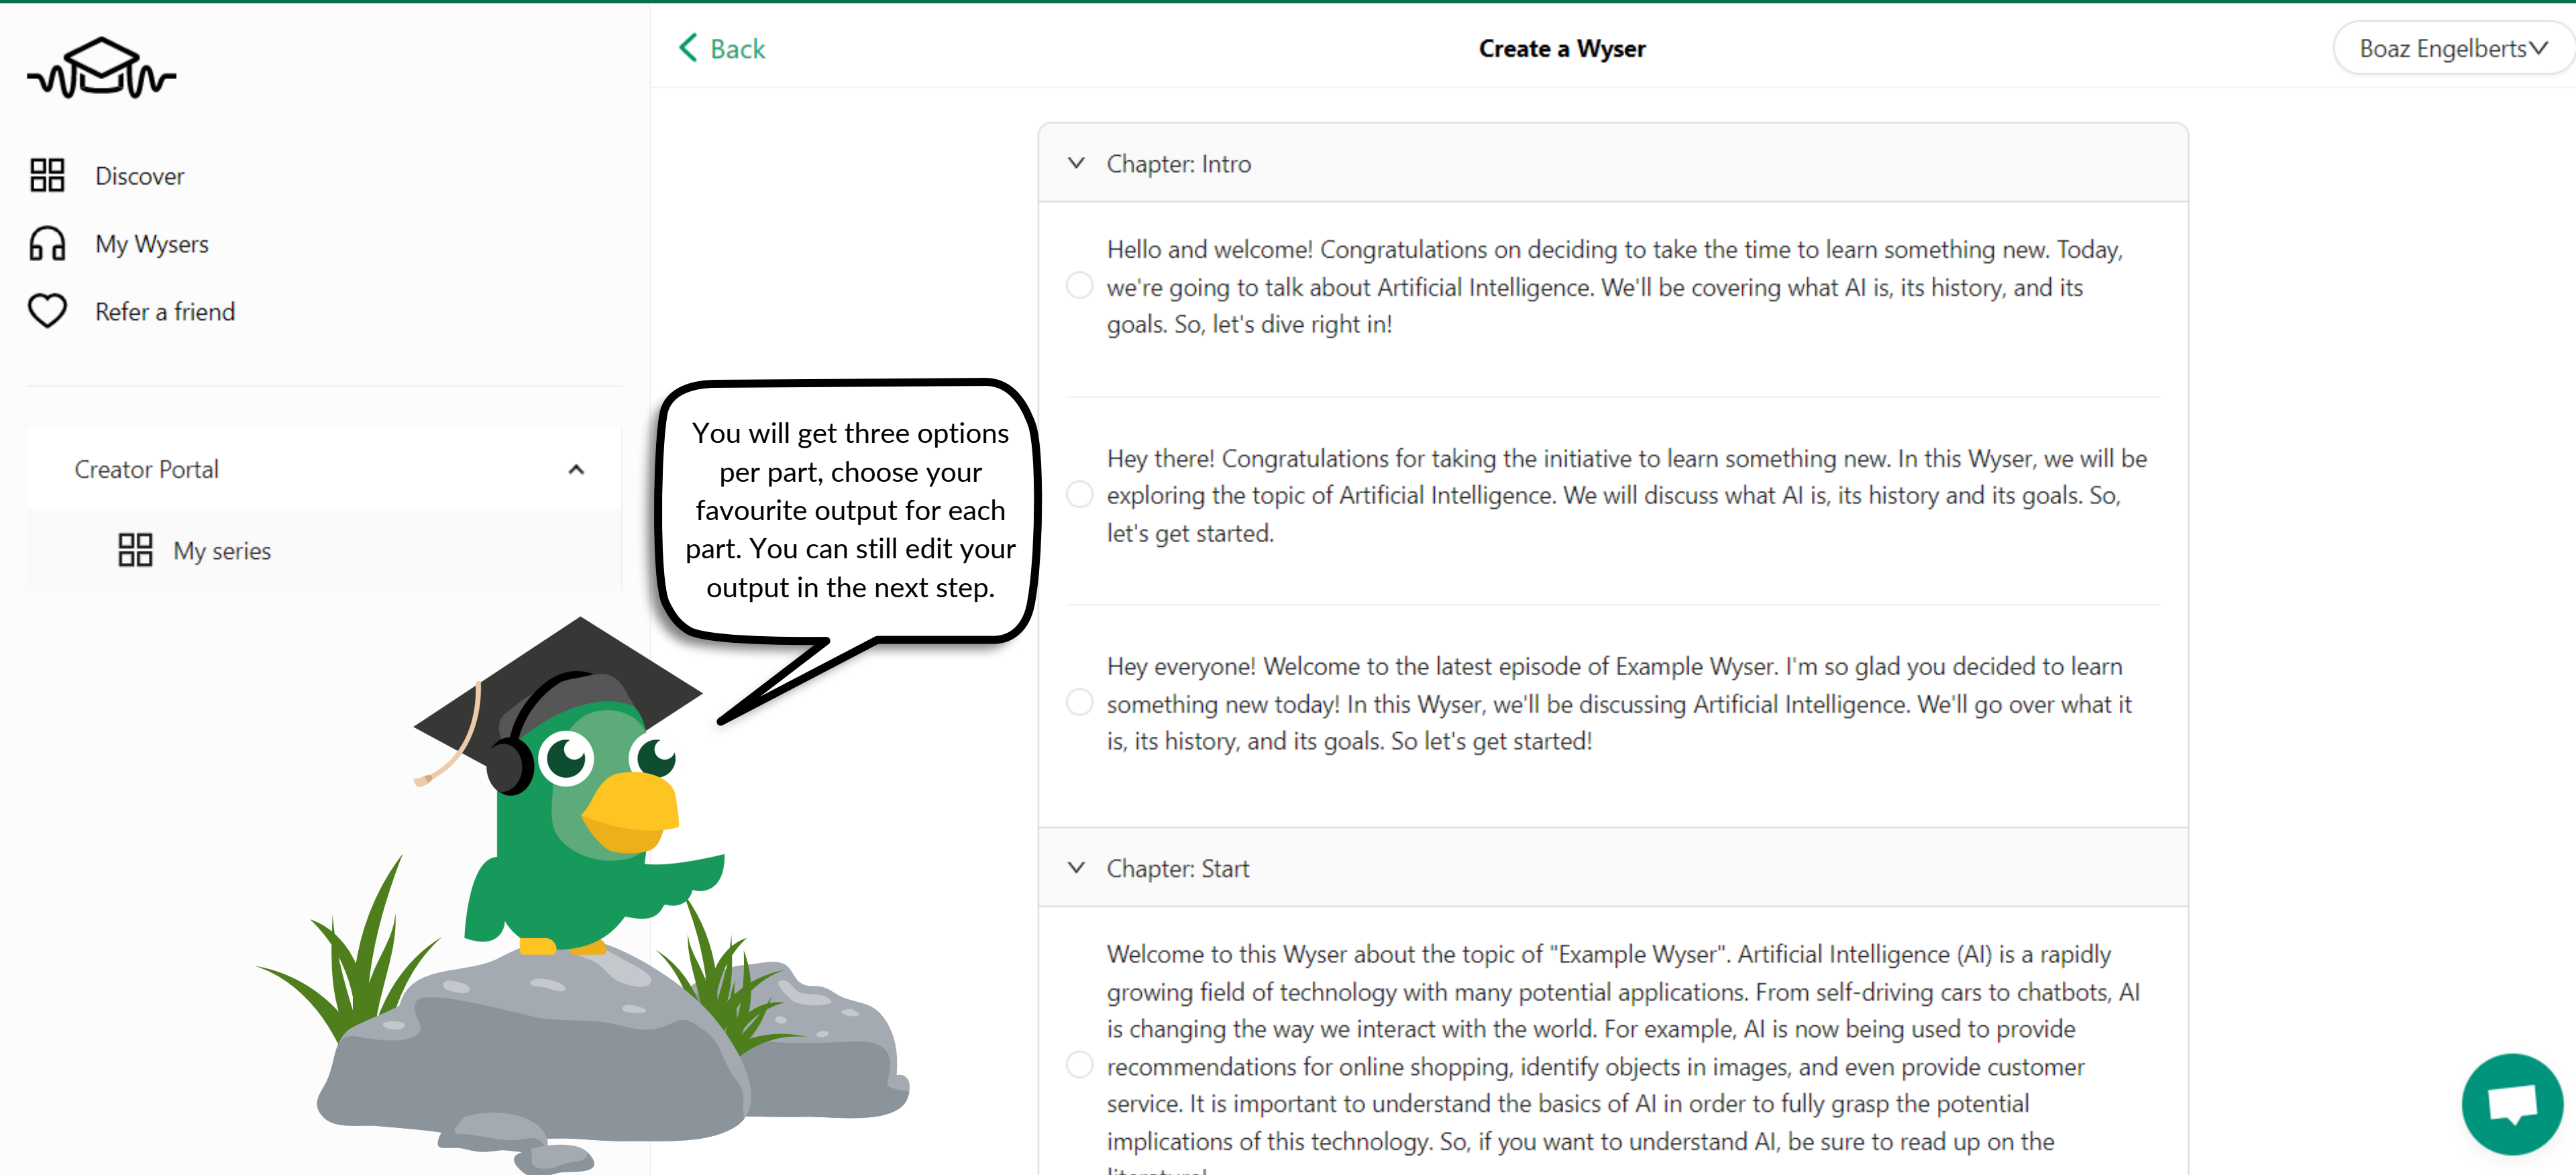

Based on the chapters you have created in the previous step, our AI will generate memorable content for you. **Each Wyser consists of four sections:** A Start, an introduction, chapters and an ending. The AI will provide three options for each section, select the one you like the most and we'll put them all together into a Wyser.

In the next step you'll be able to edit the text one last time. You can add details or change incorrect information.

- Chapter: Intro
- Chapter: Start
- Chapter: What is artificial intelligence?
- Chapter: History of AI

Be patient, this can take up to 15 minutes, you'll receive an email once your script is ready

Step 9: Choose your favourite output

The screenshot shows the 'Create a Wyser' interface. On the left is a sidebar with navigation options: Discover, My Wyses, Refer a friend, Creator Portal, and My series. The main area is titled 'Create a Wyser' and shows a 'Chapter: Intro' section with three radio button options for the introductory text. A callout box from a cartoon penguin character explains that three options are provided for each part and that they can be edited in the next step. The 'Chapter: Start' section is partially visible at the bottom.

Chapter: Intro

- Hello and welcome! Congratulations on deciding to take the time to learn something new. Today, we're going to talk about Artificial Intelligence. We'll be covering what AI is, its history, and its goals. So, let's dive right in!
- Hey there! Congratulations for taking the initiative to learn something new. In this Wyser, we will be exploring the topic of Artificial Intelligence. We will discuss what AI is, its history and its goals. So, let's get started.
- Hey everyone! Welcome to the latest episode of Example Wyser. I'm so glad you decided to learn something new today! In this Wyser, we'll be discussing Artificial Intelligence. We'll go over what it is, its history, and its goals. So let's get started!

Chapter: Start

- Welcome to this Wyser about the topic of "Example Wyser". Artificial Intelligence (AI) is a rapidly growing field of technology with many potential applications. From self-driving cars to chatbots, AI is changing the way we interact with the world. For example, AI is now being used to provide recommendations for online shopping, identify objects in images, and even provide customer service. It is important to understand the basics of AI in order to fully grasp the potential implications of this technology. So, if you want to understand AI, be sure to read up on the literature!

You will get three options per part, choose your favourite output for each part. You can still edit your output in the next step.

Step 10: Click 'Edit generated text'

✓ Awesome, the hard work is done. Now let's convert the information you have provided into a Wyser.

Based on the chapters you have created in the previous step, our AI generated memorable content for you. **Each Wyser consists of four sections:** A start, an introduction, the chapters and an ending. The AI will provide three options for each section. You just have to select the one you like the most and we'll put them all together into a Wyser.

In the next step you'll be able to edit the text one last time. You can add details or change incorrect information.

The generation of the Wyser can take up to 10 minutes. You'll get an email when it's ready or just come back to this page later.

> Chapter: Intro	✓ Chosen option
> Chapter: Start	✓ Chosen option
> Chapter: Start and causes of the Second World War	✓ Chosen option
> Chapter: Outro	✓ Chosen option

✓ You've chosen an option for all the chapters
In the next step, you'll be able to edit the generated text.

Now it's time to make sure your Wyser is well-written. It is also the **final** step before the voicing is done.

Make sure the texts are the way you want it to be for your listeners.

If your text is in another language than English, please write out all numbers and abbreviations. As an example, write out "one hundred" instead of "100" and "United States" instead of "US". If you don't edit the text, the numbers and abbreviations will be read like they will be in English.
